

Assignment-4 Script

Moiz Hussain - 201501187

Akshaj Gupta - 201502048

Topic - : Life at Planets

It is the year 5000 AD and Earth is almost dead and on the verge of extinction. The planet has become inhospitable and unfit for living due to continuous wars involving Nuclear and BioMedical weapons. The people are searching for another planet to go and live. The scientists have discovered a new planet where they find conditions suitable for humans. The humans remaining on Earth board a spaceship to go to the new planet. On reaching there they find another spaceship belonging to aliens. The aliens demand that they would be the sole inhabiting species on the planet since they had arrived first. The humans explain them how they had destroyed their planet Earth by fighting amongst themselves and propose that they live in harmony together. The aliens think about this and agree to humans proposal to live together.

Steps followed to make Animation Video

1. We used Unity, Blender and MakeHuman and Windows Movie Maker to make the animation.
2. First we made our own models in makehuman and then rendered them in unity game engine.
3. With the help of c# shrap scripts we made our models to move according to the script.
4. We also used some online available models to make the environment.
5. Finally we made our animations in unity with the help of its animator tool.
6. We added some background music from the unity and added the storyline with the help of windows movie maker.
